The Pots Company | Our values

Architectural design

We do not work with product designers, we have architects responsible for the design of our pots. This means our pots are conceived in a completely other way. Architectural design means smart, well thought out, sleek and a combination of form and function. Aesthetics is key. Our pots will always have to be stunning in every way possible.

Timeless

We develop ranges which are not bound by trends. We want our products to be pretty and relevant not only today, but also tomorrow and in ten years' time. This has some significant advantages: Consumers will always be able to buy matching pots to the ones they already have, making repeat sales more likely. Because our ranges are timeless, resellers won't be stuck with unsellable stock. What isn't sold this year can still be sold the next without the need for a sale.

Durable

Durability is our main concern. We not only want our products to withstand trends design-wise, we also want them to stand the test of time. Because of this we develop our products with the highest quality and in the case of Ecopots, also with the use of a durable base material like recycled plastics. We want all our pots to be breakproof, frost resistant and UV resistant while still being lightweight and stunning. Basically, we want our products to look good and stay good for at least 10 years.

Innovative

Another result of our architectural design approach is innovation. We want to add new, smart things to the world of pottery like invisible suspension systems, integrated drainage systems and new use of materials.

Carefree

Products from The Pots Company are carefree. With easy unboxing, stacking and practical use. We stand for our products. This means all our products come with a 10 year warranty on breakage and production faults. And when there is an issue, with resellers or consumers, it is our challenge to resolve this quick, smooth and to every one's satisfaction. Carefree in every possible way.

Conceptual (shop) presentations

Buying decisions regarding pottery are often made in the shop itself, so it is key to grasp consumers' attention in order to tell and sell your story. This is why The Pots Company puts a lot of effort in creating stunning POS material for our brands to bring forth the strong points and story of the respective brand.

The **POTS** Company nv

Ecopots, durability by design

Clean, simple lines. A minimalist design where functionality goes hand in hand with beauty. Made from recycled materials with a unique, handmade finish and completely recyclable. Belgian designed Ecopots follows the Scandinavian design philosophy which brings a sense of calm that so many are missing in their daily, stressful life.

When we designed Ecopots more than ten years ago, no one had heard about the 'plastic soup'. No one was thinking about using recycled materials for their flower pots and planters. But we did. We saw the need and potential to use recycled materials for our products and continue to do so today.

Our vision

Both our economies and products are becoming increasingly sustainable. That being said, sustainability is so much more than simply the responsible use of raw materials. We believe in developing products that are sustainable both in terms of durability and style. They should withstand damage and wear and tear, whilst remaining relevant and aesthetically pleasing for their users. After all, to us, the most sustainable products are those you can enjoy year after year, without the need to replace them.

Our brand's mission

Ecopots gives 'sustainability' a different meaning. We design, produce and sell pots made from recycled plastic and ensure they are sturdy, beautiful and stylish, not only today, but also tomorrow and in 10 years' time.

The first brand in flowerpots with a CO2 neutral label

Being a durable brand we like to take things a step further and reduce our ecological footprint even more. In November 2020 we were the first brand in flower pots and planters to receive both the CO2 Neutral Product and the CO2 Neutral Company certificate. This certificate guarantees our calculation, reduction and compensation of our local and global impact. The certificate can only be obtained through serious climate efforts and is validated by Vincotte. Through the CO2Logic programme we support three amazing climate projects. More info about these projects: www.ecopots.eu/about-ecopots.

Many times copied, never matched

At Ecopots, we only want to produce pots of superior quality. This is why we have teamed up with Centexbel, a university plastics laboratory, for the development of truly durable plastics and we ask Bureau Veritas to test our products. Supervised by the Belgian Quality Association, all Ecopots are validated for recycled content and we achieve the quality standards defined by PolyCert Europe. Every year, our certifications are evaluated and renewed to guarantee the best quality.

- FFU (freeze test, colourfastness test and leakage test)
- Polycyclic Aromatic Hydrocarbons (PAHs) Content
- Candidate List of Substances of Very High Concern for authorization published by European Chemicals Agency (ECHA) Regarding Regulation (EC) No. 1907/2006
- REACH
- Social audits (BSCI / SEDEX)
- QA-CER by the Belgian Quality Association (BQA) and PolyCert Europe
- Certification Forest Stewardship Council (FSC)
- Certification CO2 neutral product (Vincotte)
- Certification CO2 neutral company (Vincotte)

Certified composition

All Ecopots are made from a unique formula containing 80% high quality recycled plastics for a strong structure, 17% recycled natural minerals to improve durability and 3% natural mineral pigments for a timeless colour and UV protection.

80%

high quality
recycled plastics

20%

recycled natural
minerals

The origin of our recycled plastics:

- 15% post-consumer plastics
from PET and plastic shopping bags
- 80% post-industrial waste (LDPE 23% ; HDPE 35%; PP 42%)
PE from plastic bottles, coatings, packaging foil and plastic tubes
PP from diapers and sanitary napkins
- 5% circular waste from default production, reclaimed in our factory

Unique handmade finish

All Ecopots have a unique, handmade finish, making each pot different. Our compound formula of recycled plastics and natural minerals makes the pot not only strong and durable, but also very light. Ecopots are UV resistant, break-proof and resistant to temperature fluctuations, ideal for both indoor and outdoor use. They have a unique natural look and feel, making Ecopots the go-to brand for everybody looking to combine timeless design and durability.

Timeless shapes and colours

At Ecopots, we develop products which are not bound by trends. That is why we follow the Scandinavian design philosophy. In short, this philosophy is about creating a calm and clutter free home as a counter balance to our hectic and stressful daily lives. It is characterized by clean and simple lines, minimalism and the use of natural colours and materials. Ecopots are available in 6 colours and in 2022 we added a new colour: Pure White (picture left).

Key design features

An Ecopots goes through many hands during the production process. All these hands combined represent many years of experience and craftsmanship. At the start of each new design, our design team works closely with the production manager. The designers are responsible for the best looking proportions and functionality, while the production manager is in charge of the strength and quality of the product.

excess water can flow away
along the raised bottom

Matching saucers

Although it is not necessary to use a saucer, we always recommend to use one. Our pots and planters are equipped with a watertight plug at the bottom which can be removed easily.

The main purpose of a saucer is to catch excess water when watering your plants. It's a good indicator whether you're giving your plant too much or too little water. For most plants, water should make it all the way down to the bottom through the soil. If you notice a lot of water in the saucer every time you water, that means you're giving your plants too much water. But if you don't see any, you're not giving the plants enough water.

While being an excellent tool to learn your plant's watering habits, a saucer can also be used to water your plants from the bottom. The soil is soaked thoroughly by refilling the saucer several times until the water level stops decreasing. In general, watering from the top will suffice, however combining both methods will ensure a well-hydrated soil.

Ecopots, a brand that invests in marketing

Over the past years, Ecopots has undoubtedly become a very well-known brand in the world of pots, plants and garden. A vibrant brand with a clear signature and a unique look. A brand in which investments are made, in both offline and online support. Creating momentum to further build its reputation. In this way, we stimulate the rotation of sales even more, so that Ecopots will soon adorn every family's living room or terrace.

Support offline

- Highly attractive shop-in-shop concepts
- According to clearly applied styling and principles based on the brand
- To create an experience on the Ecopots shelf, as well as help with navigation (models, colours, sizes...)
- Info about product features, USPs...

Support online

- Inviting, modern and highly attractive website with clear navigation
- Clear store locator
- Active presence on social media: Facebook, Instagram, Pinterest, Youtube.
- Structured campaigns to reach the right audience.
- Ongoing investment to create a community of people with similar interests in design, sustainability and plants

Technical expertise leads to innovation

We are committed to developing technical expertise. It optimises the functionality of our current range and – even better – transforms some of our innovative ideas into reality. How do potting soil and pots interact? What about healthy plant root development? Do roots thrive best in an Ecopots flowerpot or planter? Does that accelerate plant growth? And will it also make plants more drought resistant? Those are just a few questions that we aim to find the answers to, grounded in solid research supervised by talented specialists. That way, we can back up our claims and stick to our principles.

Thinking differently is in our DNA

Ecopots is a brand that is continuously looking for solutions to make pots and planters better looking and more practical. We bring innovation to the world of pottery by bringing smart products on the market. Products such as pots with hidden suspension, integrated wheels, maximum space utilisation or carefree watering. Aesthetics are always key, combined with form, function and use. As a result of this design approach, every year we add new products to our family of pots and planters. On the following page you can find a complete overview of our new collection.

Venice 2

With the Ecopots Venice 2, overwatering your plants is a thing of the past. Water can be easily provided through the stylish opening on the side of the pot. This clear opening allows you to check the water level at any time. And when the plant needs water, it draws from the reservoir through natural capillary action. In addition, the water reservoir helps to regulate moisture content and prevents the roots from rotting in stagnant water. Extremely functional and efficient. (patent pending)

Dubai

The Ecopots Dubai combines three different pot sizes on a saucer with integrated wheels. The model forms a lovely arrangement to present and care for three plants simultaneously. Watering is done via the saucer, allowing the water to find its way evenly to the three reservoirs underneath the pots. When the water level remains visible, the reservoirs are sufficiently filled. By natural capillary action, the plants draws water from the reservoir when they need it. (patent pending)

Manhattan Wall

More and more people are living in cities. For those who don't have a garden or for those who lack the space on their balcony, Ecopots has the solution. Create your own vertical garden with a combination of Manhattan pots! They can be installed on any size of wall thanks to its modular design.

All of our Manhattan wall products include an installation template which can be very useful when installing a vertical garden. The template has various readymade patterns to choose from, simply place the sheet of paper against your wall and drill out the corresponding holes.

Ecopots and it's POS material

The philosophy of Ecopots focuses on durability. Its recycled plastic is strong and lasts long. It's only logical that we extend that long term thinking in the quality of our Point of Sales Materials. While other brands focus on providing cheap throw-away POS material, Ecopots wants to offer a better, long life quality for a reasonable price. This way the POS concepts of Ecopots keep their nice looks and attraction on the shopfloor for a long time which is crucial for the selling out of the products... POS materials pays off!
