Chaque produit est unique et le reflet de ce que nous sommes: des personnes qui  
travaillent avec enthousiasme, alliant organisation et intuition.

Wir erarbeiten Lösungen, stimmen Farben ab und gestalten Formen.

Durante il ciclo di stampaggio a iniezione, il materiale scende dalla tramoggia, viene fuso e poi iniettato nell'impronta dello stampo grazie ad un pistone che scorre nella camera di fusione. Il prodotto viene estratto dopo una fase di raffreddamento che lo solidifica, plasmandolo secondo la forma dello stampo.

fr

Pendant le cycle de moulage, le matériau qui descend de la trémie est fondu, puis injecté dans l'empreinte du moule grâce à un piston qui se déplace dans la chambre de fusion. Le produit est extrait après une phase de refroidissement qui le solidifie et lui donne la forme du moule.

de

Während des Pressvorgangs läuft das Material aus dem Trichter, wird geschmolzen und dann mit Hilfe eines Kolbens, der sich in der Schmelzkammer bewegt, in die Form gespritzt. Im Anschluss an die Abkühlphase, in der das Teil in der Gestalt, die ihm die Form verleiht, erstarrt, wird der Artikel entnommen.

es

Durante el ciclo de moldeado, el material baja de la tolva, se funde y luego se inyecta en la forma del molde gracias a un pistón que se mueve en la cámara de fusión. El producto se extrae después de una fase de enfriamiento que lo solidifica, dándole forma según las líneas del molde.

en

During the moulding cycle, the material descends from the hopper, is made molten and then injected into the mould impression by a piston that slides into the melting chamber. The product is extracted after a cooling phase that solidifies it, shaping it to the mould.

# Rotational moulding

it

Le forme sono forgiate da stampi in alluminio dove il materiale in polvere viene inserito, poi riscaldato e fuso all'interno di un forno. Durante la fase di riscaldamento, il ciclo di stampaggio prevede una rotazione lenta, per distribuire il materiale sulle pareti in modo uniforme. Successivamente, il prodotto viene raffreddato, estratto dallo stampo e rifinito manualmente.

fr

Les formes sont créées à partir de moules en aluminium où le matériau en poudre est introduit, puis chauffé et fondu dans un four. Pendant la phase de chauffage, le cycle de moulage effectue une rotation lente pour distribuer uniformément le matériau sur les parois. Le produit est ensuite refroidi, extrait du moule et fini à la main.

de

Die Formen werden aus Aluminium geschmiedet und mit dem pulverförmigen Material gefüllt, das dann in einem Ofen erhitzt und geschmolzen wird. Während der Phase des Erhitzens sieht das Verfahren ein langsames Rotieren vor. Auf diese Weise wird das Material gleichmäßig an den Wänden verteilt. Anschließend wird das Teil abgekühlt, aus der Form entnommen und von Hand fein bearbeitet.

es

Las formas se forjan a partir de moldes de aluminio donde se introduce el material en polvo, se calienta y se funde en un horno. Durante la fase de calentamiento, el ciclo de moldeado implica una rotación lenta para distribuir el material uniformemente sobre las paredes. A continuación, el producto se enfría, se retira del molde y se termina manualmente.

en

The shapes are forged from aluminium moulds where the powder material is inserted, then heated and melted inside an oven. During the heating phase, the moulding cycle involves a slow rotation to distribute the material evenly on the walls. The product is then cooled, removed from the mould and hand-finished.

- For models that are not equipped with an inline on/off switch, connect the plug of the appliance to a switch controlled outlet.
- The use and/or installation of illumination devices on instable surfaces/floors or pavement (sand, soil, grass, stones, gravel, etc.) is discouraged.
- Neither must illumination devices be installed near (adjacent to or on the same level as) swimming pools and/or other water environments.
- If light articles are set up with earth, plants and/or vases, they must be secured to the ground with our anchoring systems, where provided.
- The light outdoor pots have drainage holes inside and on the base, or a drainage tube. Both solutions are to allow excess water to drain away.
- Euro3Plast S.p.A. cannot accept liability for any damage caused to things or persons by an incorrect use of the product.
