

Deroma

Green up your life

A garden is a grand teacher.
It teaches patience and careful
watchfulness; it teaches industry
and thrift; above all it teaches
entire trust.

Gertrude Jekyll

History

Our story began in 1955 in Malo, in the Veneto region, where our main production facility still operates today.

Here, the craftsmanship of working with terracotta is part of the local identity: an ancient knowledge that Deroma has transformed into industrial expertise, becoming a reference point for the region and the entire supply chain during the 1960s and '70s.

Over time, the company expanded its use of materials, introducing innovative and sustainable solutions alongside terracotta. The 1980s and 1990s marked a phase of international expansion, through strategic acquisitions such as FANSA in Spain and Marshall Pottery in the United States, founded in 1895 in Marshall, Texas.

In 2025, we celebrate Deroma's 70th anniversary—a milestone that tells the story of seven decades of passion for terracotta, design, and plant care. Marshall Pottery also celebrates 130 years of activity: two stories distinct in origin and journey, but united by the same material and the same commitment to quality.

Celebrating these anniversaries means for us to renew the values that have always guided us: attention to people, continuous innovation, and respect for work. We continue to grow by investing in research, sustainability, and in an inclusive environment that recognizes the value of every contribution.

Storia

La nostra storia inizia nel 1955 a Malo, in Veneto, dove si trova tutt'oggi il nostro principale stabilimento di produzione.

Qui, la lavorazione della terracotta è parte dell'identità locale: un sapere antico che Deroma ha saputo trasformare in competenza industriale, affermandosi tra gli anni '60 e '70 come punto di riferimento per il territorio e per tutta la filiera.

Nel tempo, l'azienda ha ampliato l'uso dei materiali, introducendo soluzioni innovative e sostenibili accanto alla terracotta. Gli anni '80 e '90 hanno segnato una fase di espansione internazionale, attraverso acquisizioni strategiche come quella di FANSA in Spagna e Marshall Pottery negli Stati Uniti, fondata nel 1895 a Marshall, Texas.

Nel 2025 celebriamo il 70° anniversario di Deroma, un traguardo che racconta sette decenni di passione per la terracotta, il design e la cura delle piante.

Marshall Pottery raggiunge inoltre i 130 anni di attività: due storie distinte per origine e percorso, ma unite dalla stessa materia e dallo stesso impegno verso la qualità.

Celebrare questi anniversari significa per noi rinnovare i valori che ci guidano da sempre: attenzione alle persone, innovazione continua e rispetto per il lavoro.

Continuiamo a crescere investendo in ricerca, sostenibilità e in un ambiente inclusivo che riconosce il valore di ogni contributo.

Geschichte

Die Verarbeitung von Terrakotta ist hier Teil der lokalen Identität: ein altes Wissen, das Deroma in industrielles Know-how verwandelt umgewandelt hat und sich in den 60er- und 70er-Jahren als Referenzunternehmen für die Region und die gesamte Lieferkette etabliert hat.

Im Laufe der Zeit hat das Unternehmen die Materialverwendung erweitert und neben der Terrakotta innovative sowie nachhaltige Lösungen eingeführt. Die 1980er- und 1990er-Jahre waren eine Phase der internationalen Expansion, gekennzeichnet durch strategische Übernahmen wie FANSA in Spanien und Marshall Pottery in den USA, gegründet im Jahr 1895 in Marshall, Texas.

Unsere Geschichte begann 1955 in Malo, Venetien, wo sich auch heute noch unser Hauptproduktionsstandort befindet.

2025 feiern wir das 70-jährige Jubiläum von Deroma – ein Meilenstein, der sieben Jahrzehnte Leidenschaft für Terrakotta, Design und Pflanzenpflege widerspiegelt. Auch Marshall Pottery feiert sein 130-jähriges Tätigkeit : zwei Geschichten mit unterschiedlichem Ursprung und Entwicklung, aber verbunden durch das gleiche Material und das gleiche Engagement für Qualität.

Diese Jubiläen zu feiern bedeutet für uns, die Werte zu erneuern, die uns seit jeher leiten: Aufmerksamkeit für Menschen, kontinuierliche Innovation und Respekt vor der Arbeit. Wir wachsen weiterhin, indem wir in Forschung, Nachhaltigkeit und ein inklusives Umfeld investieren, das den Wert jedes Beitrags anerkennt.

Our Values

Since 1955, we have been developing and manufacturing pots designed for plant well-being and gardening tools.

DEROMA supports and helps Garden Lovers to fully enjoy the gardening experience.

DEROMA incoraggia e aiuta gli amanti del giardinaggio a vivere appieno la Gardening Experience.

DEROMA unterstützt und hilft Gartenfans, ihre Gartenarbeit in vollen Zügen zu genießen.

We believe that taking care of plants is not just about appreciating their beauty, but also about cultivating well-being and finding moments of personal growth.

Our focus on an individual and immersive experience, capable of expressing each person's personality, is accompanied by a desire to offer solutions that enhance the connection between nature and daily life. This vision is supported by our commitment to responsible and sustainable evolution, which translates into actions: from adopting more energy-efficient production systems, such as the new solar panels equal to planting 11000 trees a year, to using low environmental impact materials, natural, recycled, or recyclable.

Our focus on sustainability is exemplified by our new photovoltaic system, generating 3,700,000 kWh of clean energy annually!

This initiative will reduce CO2 emissions by 1500 tons each year, equivalent to planting 11,000 trees annually.

La nostra attenzione alla sostenibilità è messa in evidenza dal nostro nuovo impianto fotovoltaico, che genera 3.700.000 kWh di energia pulita all'anno! Questo intervento ridurrà le emissioni di CO2 di 1500 tonnellate ogni anno, equivalenti alla piantumazione di 11.000 alberi all'anno.

Unser Ziel der Nachhaltigkeit veranschaulicht unsere neue Photovoltaikanlage, die jährlich 3.700.000 kWh saubere Energie erzeugt! Diese Initiative wird die CO2-Emissionen um 1500 Tonnen pro Jahr reduzieren, was der Pflanzung von 11 000 Bäumen pro Jahr entspricht.

I nostri valori

Crediamo che prendersi cura delle piante significhi non solo godere della loro bellezza, ma anche coltivare sé stessi e far fiorire il proprio tempo. L'attenzione per un'esperienza individuale e immersiva, capace di esprimere la personalità di ciascuno, si accompagna alla volontà di offrire soluzioni che valorizzano il rapporto tra natura e quotidianità.

Dal 1955 sviluppiamo e produciamo vasi pensati per il benessere delle piante e strumenti da giardinaggio.

A questa visione si unisce il nostro impegno verso un'evoluzione responsabile e sostenibile, che si traduce in azioni concrete: dall'adozione di sistemi produttivi a maggior efficientamento energetico, come il nuovo impianto fotovoltaico, all'impiego di materiali a ridotto impatto ambientale, naturali, riciclati o riciclabili.

Unsere Werte

Seit 1955 entwickeln und produzieren wir Töpfe, die auf das Wohlbefinden von Pflanzen und Gartenwerkzeuge ausgerichtet sind.

Wir glauben, dass die Pflege von Pflanzen nicht nur bedeutet, ihre Schönheit zu genießen, sondern auch sich selbst zu pflegen und seine Zeiterblühen zu lassen. Die Aufmerksamkeit für ein individuelles und immersives Erlebnis, das die Persönlichkeit jedes Einzelnen zum Ausdruck bringen kann, geht einher mit dem Wunsch, Lösungen anzubieten, die die Beziehung zwischen Natur und Alltag fördern.

Diese Vision geht einher mit unserem Engagement für eine verantwortungsvolle und nachhaltige Entwicklung, die sich in konkreten Maßnahmen ausdrückt: von der Einführung energieeffizienterer Produktionssysteme, wie einer neuen Photovoltaikanlage, bis hin zur Verwendung umweltfreundlicher Materialien – natürlicher, recycelter oder recycelbarer.

MALO PLANT CERTIFICATIONS

Customer satisfaction, environmental protection and people development: these are the principles that guide every decision we make.

That is why we have adopted an integrated management system, certified according to **UNI EN ISO 9001** standards for Quality and **UNI EN ISO 14001** for environmental management. We focus on the excellence of our products and services before, during and after the sale, together with careful management of natural resources and respect for the environment.

To complete this commitment, we have also obtained **UNI/PdR 125:2022** certification for gender equality, which demonstrates our desire to build a fair, inclusive and people-oriented working environment.

CERTIFICAZIONI STABILIMENTO MALO

Soddisfazione dei clienti, tutela dell'ambiente e valorizzazione delle persone: sono questi i principi che guidano ogni nostra scelta.

Per questo abbiamo adottato un sistema di gestione integrato, certificato secondo gli standard **UNI EN ISO 9001** per la Qualità e **UNI EN ISO 14001** per la gestione ambientale.

Poniamo al centro l'eccellenza dei nostri prodotti e dei servizi prima, durante e dopo la vendita insieme a un'attenta gestione delle risorse naturali e al rispetto per l'ambiente. A completare questo impegno, anche la certificazione **UNI/PdR 125:2022** per la parità di genere, che testimonia la nostra volontà di costruire un ambiente di lavoro equo, inclusivo e attento alle persone.

PRODUKTIONSSTÄTTE MALO - ZERTIFIZIERUNGEN

Kundenzufriedenheit, Umweltschutz und Wertschätzung gegenüber Menschen: das sind die Grundsätze, die unser Handeln leiten. Aus diesem Grund haben wir ein integriertes Managementsystem eingeführt, das nach den Normen **UNI EN ISO 9001** für Qualität und **UNI EN ISO 14001** für Umweltmanagement zertifiziert ist. Im Mittelpunkt stehen für uns die Exzellenz unserer Produkte und Dienstleistungen vor, während und nach dem Verkauf, sowie ein sorgfältiger Umgang mit natürlichen Ressourcen und Respekt gegenüber der Umwelt.

Ergänzt wird dieses Engagement durch die Zertifizierung nach **UNI/PdR 125:2022** für die Gleichstellung der Geschlechter, die unseren Anspruch zum Ausdruck bringt, ein faires, integratives und menschenzentriertes Arbeitsumfeld zu schaffen.

Safeguard precious resources

For us, sustainability is a concrete and constant choice. We want to contribute to the protection of the planet's water and energy resources with concrete actions aimed at reducing waste and environmental impact.

We are also committed to promoting sustainable behaviours and habits by designing tools that encourage the care and protection of these resources.

Salvaguardia di risorse preziose

Per noi, la sostenibilità è una scelta concreta e costante. Desideriamo contribuire alla tutela delle risorse idriche ed energetiche del pianeta con azioni concrete, volte a ridurre gli sprechi e l'impatto ambientale.

Ci impegniamo inoltre a promuovere comportamenti e abitudini sostenibili, progettando strumenti in grado di incentivare la cura e la protezione di queste risorse.

Wir schützen wertvolle Ressourcen

Für uns ist Nachhaltigkeit eine konkrete und dauerhafte Entscheidung. Wir möchten mit konkreten Maßnahmen zum Schutz der Wasser- und Energieressourcen unseres Planeten beitragen, indem wir Verschwendung vermeiden und Umweltbelastungen reduzieren.

Darüber hinaus setzen wir uns für die Förderung nachhaltiger Verhaltensweisen und Gewohnheiten ein, indem wir Werkzeuge entwickeln, die Anreize für die Pflege und den Schutz dieser Ressourcen schaffen.

Dune

Dune is designed with an integrated saucer for collecting excess water keeping the soil moist for a long time ensuring the correct irrigation to the plant.

Modul'O

With the **Modul'O** collection, Deroma has introduced a simple and ingenious solution to the market, which allows you to create a natural water reserve system by combining a pot, a bowl and a common cotton wick. The wick, inserted into the pot and immersed in the water contained in the bowl, ensures the necessary amount of water for the plant's nourishment thanks to its ability to absorb water.

The new **Modul'O** window box maintains the same operating principle, offering a new shape designed for other types of plants and new space and style requirements.

AquaDO

AquaDO products, the result of Deroma's innovation, create a natural irrigation system suitable for both in-ground and potted plants, as well as for vegetable gardens. When placed in the soil (or in a pot) near the plant, **AquaDO** uses the breathability of terracotta to allow the roots to naturally absorb the water they need. This system, in addition to ensuring water savings during growth, also promotes downward and lateral root development, contributing to the plant's overall well-being and more balanced growth.

Dune è stato disegnato completo di un sottovaso integrato per la raccolta dell'acqua in eccesso e per assicurare la giusta quantità alla pianta conservando il terreno umido a lungo.

Dune ist mit einer integrierten Untersetzer ausgestattet, die überschüssiges Wasser auffängt und so die Erde lange feucht hält, sodass die Pflanze richtig bewässert wird.

Con la collezione **Modul'O**, Deroma ha introdotto una soluzione semplice e ingegnosa sul mercato, che permette di creare un sistema di riserva d'acqua naturale unendo un vaso, una ciotola e un comune stoppino di cotone.

Lo stoppino, inserito nel vaso e immerso nell'acqua contenuta nella ciotola, grazie alla capacità di assorbire l'acqua, assicura la quantità necessaria al nutrimento della pianta.

La nuova window box **Modul'O** mantiene lo stesso principio di funzionamento offrendo una nuova forma pensata per altre tipologie di piante e nuove esigenze di spazio e stile.

Mit der Kollektion **Modul'O** hat Deroma eine einfache und geniale Lösung auf den Markt gebracht, mit der sich ein natürliches Wasserspeichersystem aus einem Topf, einer Schale und einem gewöhnlichen Baumwolldocht zusammensetzen lässt.

Der Docht wird in den Blumentopf gesteckt und in das Wasser in der Schale getaucht. Dank seiner Fähigkeit, Wasser aufzunehmen, sorgt er für die notwendige Wasserzufuhr zur Versorgung der Pflanze.

Die neue Fensterbox **Modul'O** funktioniert nach dem gleichen Prinzip, bietet jedoch eine neue Form, die für andere Pflanzenarten und neue Anforderungen an Platz und Stil konzipiert ist.

I prodotti **AquaDO**, frutto dell'innovazione Deroma, permettono di creare un sistema di irrigazione naturale, adatto sia per le piante interrate che per quelle in vaso e per l'orto. Inserito nel terreno (o nel vaso) in prossimità della pianta, grazie alla traspirabilità della terracotta, **AquaDO** consente alle radici di assorbire l'acqua di cui hanno bisogno in modo naturale.

Questo sistema, oltre a garantire un risparmio idrico durante la crescita, favorisce anche lo sviluppo delle radici verso il basso e lateralmente, contribuendo al benessere generale della pianta e a una crescita più equilibrata

Die **AquaDO**-Produkte, eine Innovation von Deroma, ermöglichen die Schaffung eines natürlichen Bewässerungssystems, das sowohl für im Boden gepflanzte als auch für Topf- und Gemüsepflanzen geeignet ist. Im Boden (oder im Topf) in der Nähe der Pflanze platziert, ermöglicht **AquaDO** dank der Atmungsaktivität von Terrakotta den Wurzeln, auf natürliche Weise das benötigte Wasser aufzunehmen.

Dieses System spart nicht nur Wasser während des Wachstums, sondern fördert auch das Wurzelwachstum nach unten und seitlich, was zum allgemeinen Wohlbefinden der Pflanze und zu einem ausgewogeneren Wachstum beiträgt.

What are you made of?

All the different materials we use are carefully selected according to the highest standards of design, quality and environmental sustainability.

Founded as a manufacturer specialising in terracotta, Deroma is now a global player in the world of plant pots, conceiving, designing and manufacturing products in different materials to offer an increasingly environmentally friendly range.

Di che pasta sei fatto?

Tutti i diversi materiali che utilizziamo sono selezionati con attenzione considerando i più elevati standard di design, qualità e sostenibilità ambientale.

Nata come produttore specializzato nella lavorazione della terracotta, Deroma oggi è un player globale nel mondo del vaso, ideando, progettando e realizzando prodotti in diversi materiali per offrire una gamma sempre più rispettosa dell'ambiente.

Woraus seid ihr?

Alle von uns verwendeten Materialien werden sorgfältig unter Berücksichtigung der höchsten Standards in Bezug auf Design, Qualität und Umweltverträglichkeit ausgewählt.

Deroma begann als Spezialist für die Verarbeitung von Terrakotta und ist heute ein globaler Akteur in der Welt der Pflanzgefäße, der Produkte aus verschiedenen Materialien entwirft, entwickelt und herstellt, um ein immer umweltfreundlicheres Sortiment anzubieten.

Terracotta

Natural Material

Terracotta is one of the most natural materials; ideal for plant well-being because it promotes air and water circulation, contributing to healthy root growth. It offers resistance to temperatures as low as -15°C, protecting the plant even during the coldest seasons.

Tuscany terracotta

We make pots using different types of clay and different production processes, with bright colours and unique finishes, to offer different solutions based on style, taste and environment.

Injection Plastic

Design for Recycling

All our plastic products are made from recycled materials, sourced from both post-consumer urban waste collection and post-production industrial waste collection, to ensure complete sustainability. Above all, they are designed to be completely recyclable: the collection is based on the principle of Design for Recycling, with the aim of creating products composed as much as possible of a single material, so as to facilitate disposal at the end of their life cycle. These solutions embody our commitment to increasingly responsible design.

Terracotta

Materiale Naturale

La terracotta è tra i materiali più naturali; ideale per il benessere della pianta perché favorisce la circolazione dell'aria e dell'acqua, contribuendo a una crescita sana delle radici.

Offre resistenza fino a temperature di -15°C, proteggendo la pianta anche durante le stagioni più fredde.

Terrakotta

Naturmaterial

Terrakotta gehört zu den natürlichsten Materialien und ist ideal für das Wohlbefinden der Pflanzen, da es die Luft- und Wasserzirkulation fördert und so zu einem gesunden Wurzelwachstum beiträgt.

Es ist bis zu Temperaturen von -15 °C frostbeständig und schützt die Pflanzen auch in den kältesten Jahreszeiten.

Terracotta Tuscany

Realizziamo vasi utilizzando diverse tipologie di argilla e secondo processi produttivi diversi, con colori brillanti e finiture uniche, per offrire soluzioni diverse in base a stili, gusto e ambienti.

Terrakotta Tuscany

Wir stellen Töpfe aus verschiedenen Tonarten und nach unterschiedlichen Herstellungsverfahren her, mit leuchtenden Farben und einzigartigen Oberflächen, um verschiedene Lösungen je nach Stil, Geschmack und Umgebung anzubieten.

Plastica a iniezione

Design for Recycling

Tutti i nostri prodotti in plastica nascono dall'impiego di materiali riciclati, provenienti sia dalla raccolta urbana post consumo che dalla raccolta industriale post produzione, per garantire una sostenibilità completa.

Ma soprattutto, sono progettati per essere completamente riciclabili: la collezione si basa infatti sul principio del Design for Recycling, con l'obiettivo di realizzare prodotti composti il più possibile da un solo materiale, così da facilitare lo smaltimento a fine ciclo di vita.

Soluzioni che incarnano in modo concreto il nostro impegno verso un design sempre più responsabile.

Spritzgusskunststoff

Design for Recycling

Alle unsere Kunststoffprodukte werden aus recycelten Materialien hergestellt, die sowohl aus der städtischen Nachverbrauchs- als auch aus der industriellen Nachproduktionssammlung stammen, um vollständige Nachhaltigkeit zu gewährleisten. Vor allem aber sind sie so konzipiert, dass sie vollständig recycelbar sind: Die Kollektion basiert auf dem Prinzip „Design for Recycling“ mit dem Ziel, Produkte herzustellen, die möglichst aus einem einzigen Material bestehen, um die Entsorgung am Ende ihres Lebenszyklus zu erleichtern. Lösungen, die unser Engagement für ein immer verantwortungsbewussteres Design konkret verkörpern.

PLASTIC
Recycled & Recyclable

Pots, containers of happiness and well-being

We innovate with new shapes,
materials, features and accessories
that help plants grow better, with a
particular focus on water saving.

At the same time, we put the people who use our products at the centre. Taking care of plants and relaxing in your garden is a simple way to feel good, reconnect with nature and reduce stress. To grow plants well, you really only need to take a few precautions. Assess the light, choose the right place and use accessories designed to simplify daily care: raising pots off the ground helps to protect them better, while supports and structures are useful for easily accompanying the growth of climbing plants.

Even small gestures such as adding a layer of expanded clay or geotextile to the base of the pot can make a difference, helping drainage and keeping the roots healthy.

Small details that make everything easier and that our products can help you put into practice every day.

Vasi, contenitori di felicità e benessere

Innoviamo grazie a nuove forme, materiali, funzionalità e accessori che aiutano le piante a crescere meglio, con un'attenzione particolare al risparmio d'acqua.

Allo stesso tempo, mettiamo al centro le persone che usano i nostri prodotti. Prendersi cura delle piante e rilassarsi nel proprio giardino è un modo semplice per stare bene, riconnettersi con la natura e ridurre lo stress. Per far crescere bene le piante, bastano davvero pochi accorgimenti. Valuta la luce, scegli il posto giusto e usa gli accessori pensati per semplificare la cura quotidiana: sollevare i vasi da terra aiuta a proteggerli meglio, mentre supporti e strutture sono utili per accompagnare con facilità la crescita delle rampicanti.

Anche piccoli gesti come inserire uno strato di argilla espansa o geotessuto alla base del vaso possono fare la differenza, aiutando il drenaggio e mantenendo le radici sane.

Piccole attenzioni che rendono tutto più semplice e che i nostri prodotti possono aiutarti a mettere in pratica ogni giorno.

Töpfe, Behälter des Glücks und Wohlbefindens

Wir innovieren durch neue Formen, Materialien, Funktionen und Zubehörteile, die Pflanzen dabei helfen, besser zu wachsen, wobei wir besonders auf die Wassereinsparung achten.

Gleichzeitig stellen wir die Menschen, die unsere Produkte verwenden, in den Mittelpunkt. Sich um Pflanzen zu kümmern und sich im eigenen Garten zu entspannen, ist eine einfache Möglichkeit, sich wohlfühlen, sich wieder mit der Natur zu verbinden und Stress abzubauen. Damit Pflanzen gut wachsen, sind nur wenige Maßnahmen erforderlich. Berücksichtigen Sie die Lichtverhältnisse, wählen Sie den richtigen Standort und verwenden Sie Zubehör, das die tägliche Pflege vereinfacht: Das Anheben der Töpfe vom Boden schützt sie besser, während Stützen und Strukturen das Wachstum von Kletterpflanzen erleichtern. Auch kleine Maßnahmen wie das Einlegen einer Schicht Blähton oder Geotextil am Boden des Topfes können einen Unterschied machen, da sie die Drainage unterstützen und die Wurzeln gesund halten. Kleine Aufmerksamkeit, die alles einfacher machen und die Sie mit unseren Produkten jeden Tag praktisch umsetzen können.

Integrated water reserve

Many of our products, both terracotta and plastic, are equipped with a water reserve system, designed to ensure a constant and correct supply to the plant's root system, both indoors and outdoors. In some models of the plastic line, a practical level indicator allows you to easily monitor water consumption.

Easy to move!

Moving lots of pots and containers is easy and safe thanks to the built-in wheels on our larger models. Double-walled plastic structure ensures strength and lightness, making them easy to move around. The rubber cap for indoor/outdoor use, found on several items, is accessible and can be stored in the special compartment, reducing the risk of loss.

Accessories

New convenient and functional accessories are available for the Cosmo collection of cubes and boxes, including a structure designed to support climbing plants and encourage vertical growth, making the most of even the smallest spaces.

Riserva d'acqua integrata

Molti dei nostri prodotti, sia in terracotta che in plastica, sono dotati di un sistema di riserva d'acqua, studiato per garantire un apporto costante e corretto all'apparato radicale della pianta, sia in ambienti interni che esterni. In alcuni modelli della linea in plastica, un pratico indicatore di livello consente di monitorare facilmente il consumo d'acqua.

Integriertes Wasserreservoir

Viele unserer Produkte, sowohl aus Terrakotta als auch aus Kunststoff, sind mit einem Wasserreservesystem ausgestattet, das sowohl im Innen- als auch im Außenbereich eine konstante und optimale Versorgung des Wurzelwerks der Pflanze gewährleistet. Bei einigen Modellen der Kunststoffserie ermöglicht eine praktische Füllstandsanzeige eine einfache Überwachung des Wasserverbrauchs.

Spostarli è facile!

Lo spostamento di molti vasi e contenitori risulta agevole e sicuro grazie alle ruote integrate. Nei modelli di maggiori dimensioni, la struttura a doppia parete in plastica garantisce resistenza e leggerezza, facilitando la movimentazione. Il tappino in gomma per uso indoor/outdoor, presente su diversi articoli, è accessibile e alloggiabile nell'apposito vano, riducendo il rischio di smarrimento.

Leicht zu bewegen!

Dank der integrierten Rollen lassen sich viele Töpfe und Behälter einfach und sicher bewegen. Bei den größeren Modellen sorgt die doppelwandige Kunststoffkonstruktion für Stabilität und Leichtigkeit, was die Handhabung erleichtert. Der Gummistopfen für den Innen- und Außenbereich, der bei verschiedenen Artikeln vorhanden ist, ist leicht zugänglich und kann in einem speziellen Fach untergebracht werden, wodurch das Risiko eines Verlusts verringert wird.

Accessori

Sulla collezione di cubi e cassette Cosmo sono disponibili nuovi comodi e funzionali accessori, tra i quali una struttura pensata per supportare le piante rampicanti e favorirne la crescita in verticale, valorizzando anche gli spazi più piccoli.

Zubehör

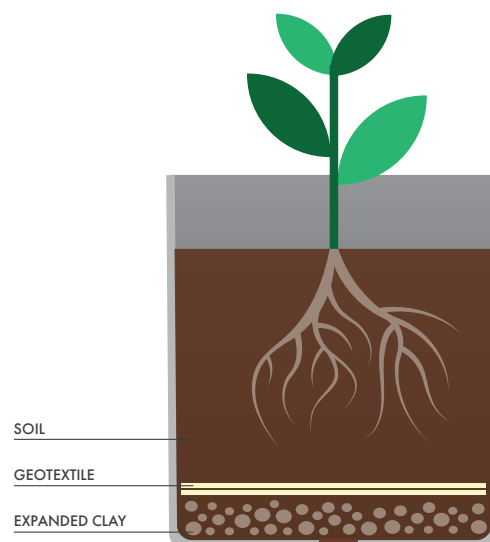

Für die Kollektion Cosmo mit Würfeln und Kästen sind neue praktische und funktionale Accessoires erhältlich, darunter eine Struktur, die Kletterpflanzen stützt und ihr vertikales Wachstum fördert, wodurch auch kleinste Räume optimal genutzt werden können.

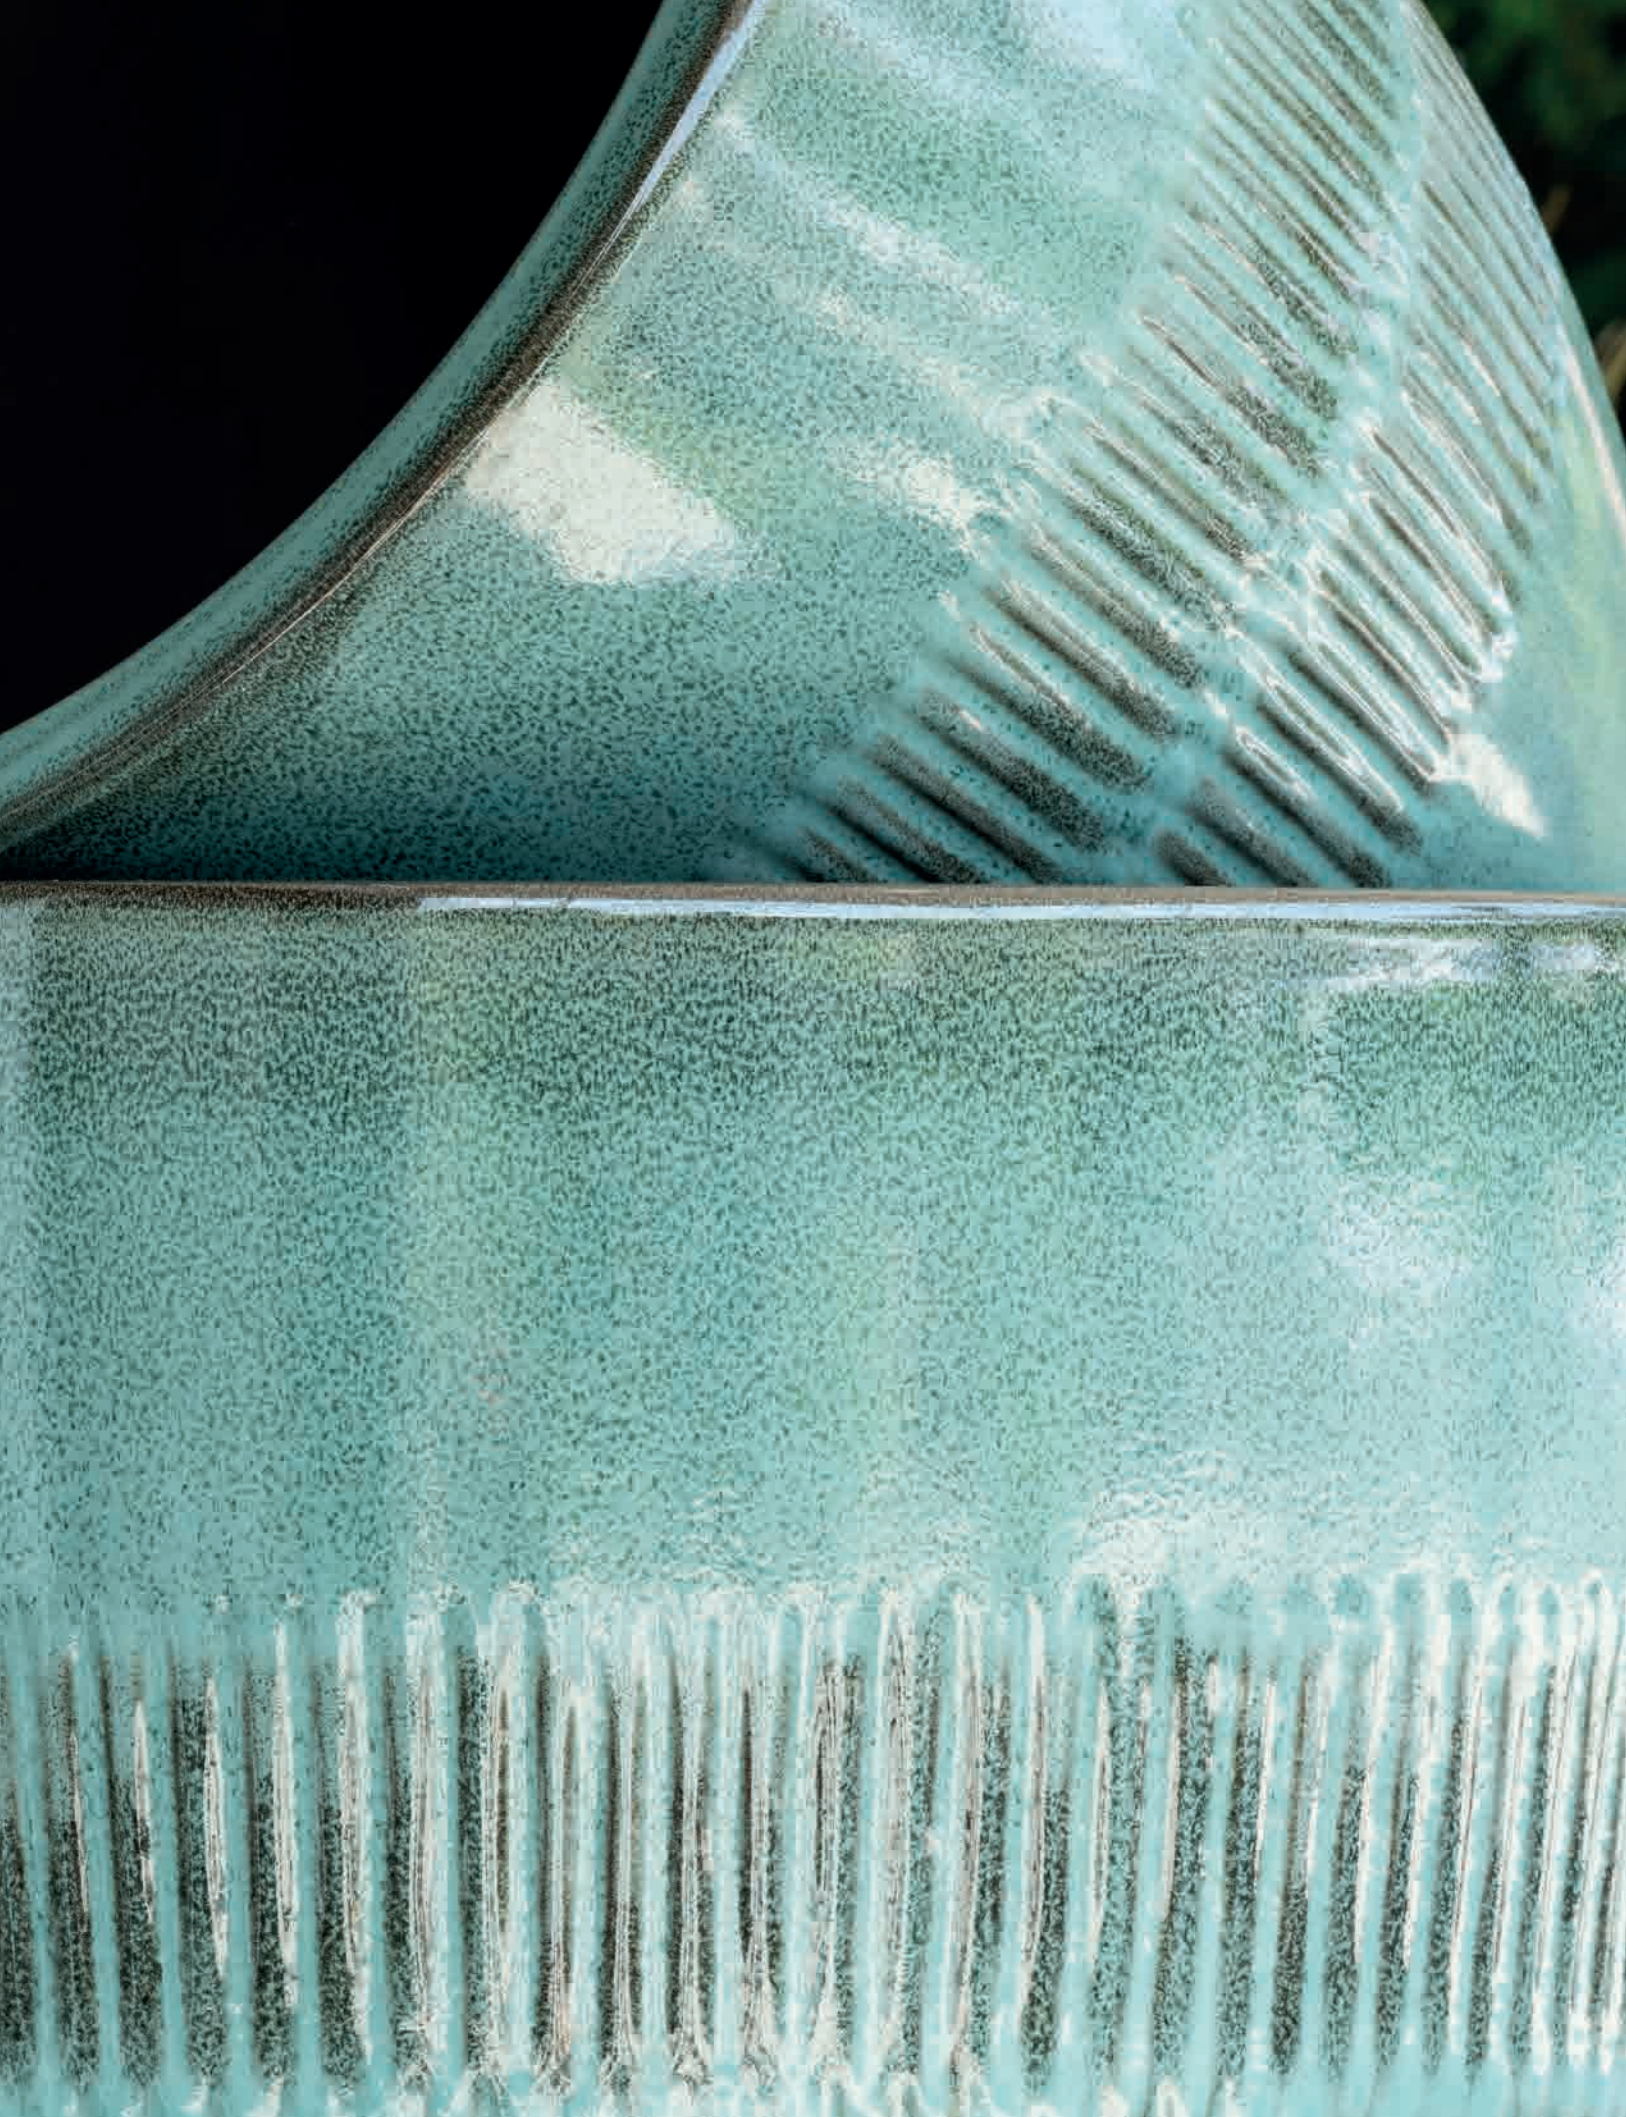

Potting Tips

For a perfect potting of the plant, we suggest always placing a layer of expanded clay on the bottom of the pot to facilitate water drainage. Then, cover the clay with geotextile, which will prevent the soil from blocking the drainage hole on the bottom. At this point, you can fill the pot with the specific soil for the plant and proceed with potting...

Per una perfetta invasatura della pianta, suggeriamo di porre sempre uno strato di argilla espansa sul fondo del vaso per favorire il drenaggio dell'acqua. Successivamente, si ricopre l'argilla con del geotessuto, che eviterà che il terriccio ostruisca il foro di drenaggio sul fondo. A questo punto, si può riempire il vaso con il terriccio specifico per la pianta e procedere all'invasatura...

Für ein perfektes Eintopfen empfehlen wir, immer eine Schicht Blähton auf den Topfboden zu legen, um den Wasserablauf zu erleichtern. Decken Sie den Ton anschließend mit Geotextil ab, damit die Erde das Abflussloch im Boden nicht verstopft. Füllen Sie den Topf anschließend mit der passenden Pflanzenerde und beginnen Sie mit dem Eintopfen.

Perspectives of creativity

An extraordinary range of styles, shapes, colours, textures and finishes, a collection of designs and volumes created to interpret ever-changing tastes, trends and environments.

Deroma products are the result of free, dynamic and multifaceted stylistic research, guided by a deep sense of harmony and elegance. Constantly new interpretations of consolidated knowledge: not only terracotta creations, but also innovative forms of different materials, plastic, composites and other modern solutions.

Orizzonti Creativi

Uno straordinario ventaglio di stili, forme, colori, texture e finiture, una collezione di segni e volumi pensata per interpretare gusti, tendenze e ambienti in continua evoluzione.

I prodotti Deroma sono il risultato di una ricerca stilistica libera, dinamica e multiforme, guidata da un profondo senso di armonia ed eleganza.

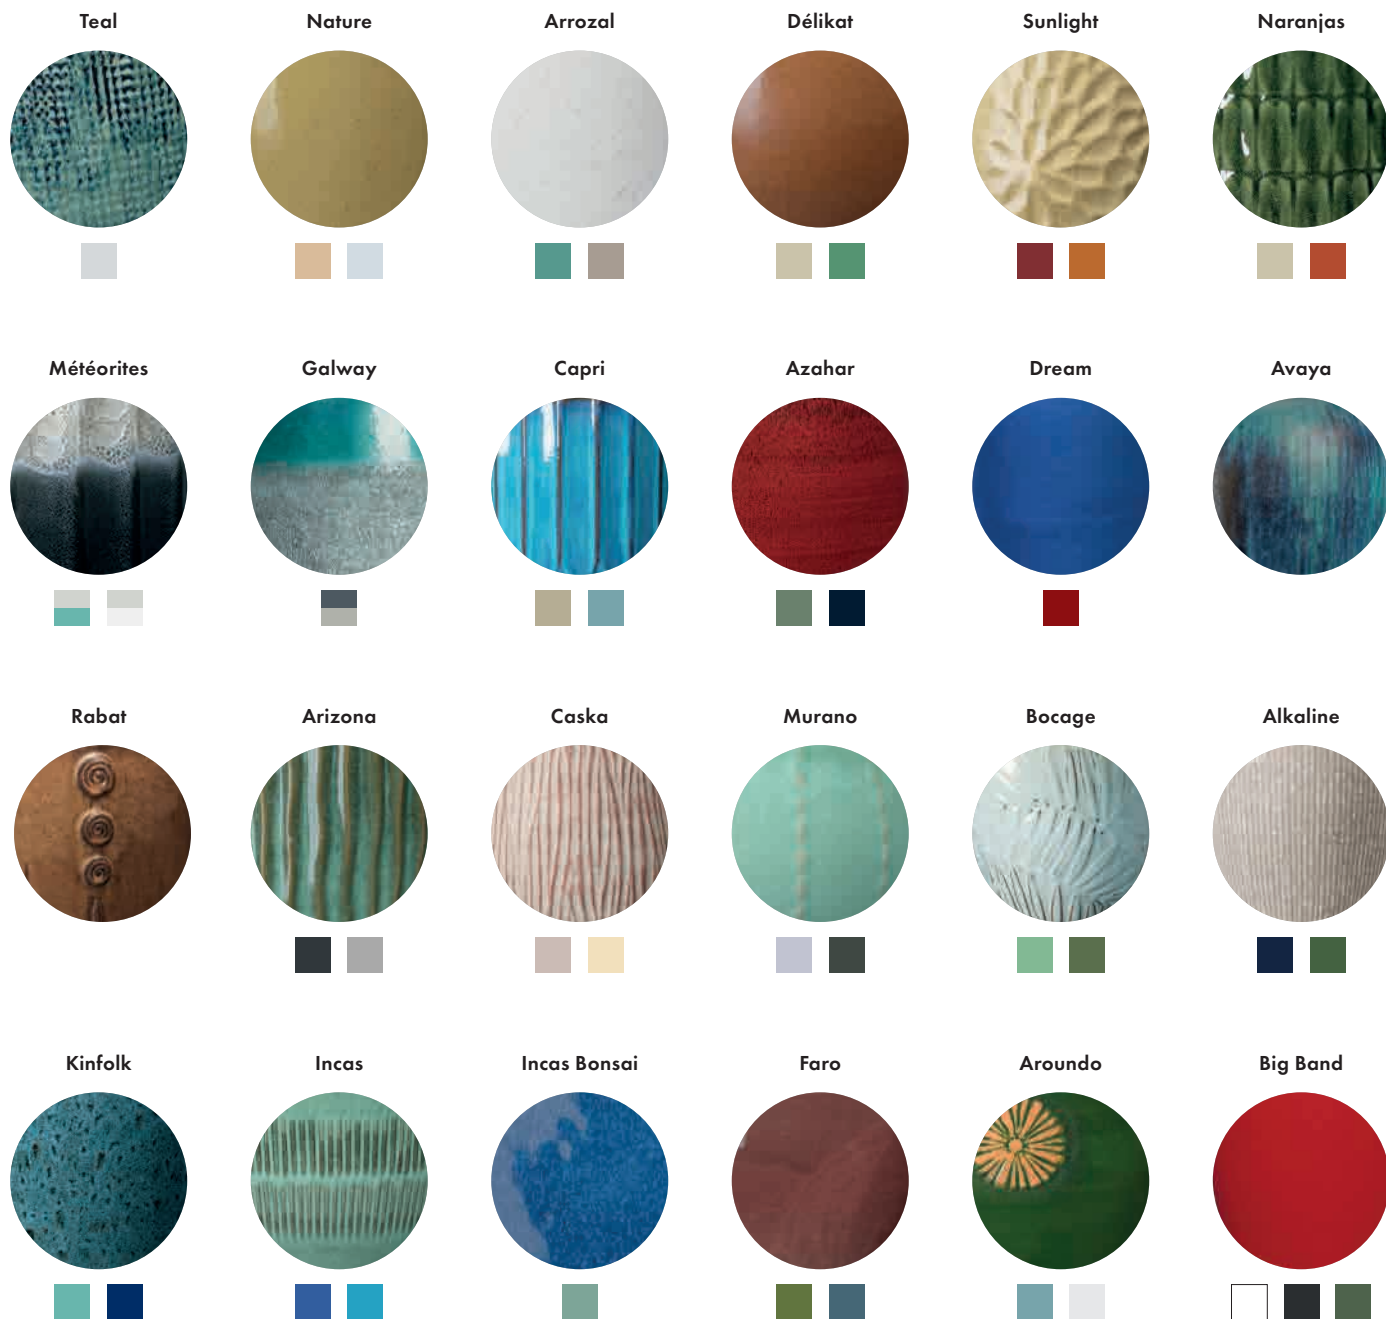

Interpretazioni sempre nuove di un sapere consolidato: non solo creazioni in terracotta, ma anche forme innovative di materiali diversi, plastica, compositi e altre soluzioni moderne.

Perspektiven der Kreativität

Eine außergewöhnliche Auswahl an Stilen, Formen, Farben, Texturen und Oberflächen, eine Kollektion von Zeichen und Volumen, die dafür entwickelt wurde, sich ständig weiterentwickelnde Geschmäcker, Trends und Umgebungen zu interpretieren.

Die Produkte von Deroma sind das Ergebnis einer freien, dynamischen und vielgestaltigen Stilforschung, die von einem tiefen Sinn für Harmonie und Eleganz geleitet wird.

Immer neue Interpretationen eines fundierten Wissens: nicht nur Kreationen aus Terrakotta, sondern auch innovative Formen aus verschiedenen Materialien, wie Kunststoff, Verbundwerkstoffen und anderen modernen Lösungen.

Style research, shapes, finishes, and colour development come together in Deroma collections to create vibrant and original products.

These products are the result of different processes: from the glazed finishes of the Handmade Glazed collections to artisanal terracotta, up to latest-generation plastic solutions.

Each material is enhanced by a refined colour study, with matte, glossy, or natural tones designed to suit different styles and environments.

Ricerca di stile, forme, finiture e sviluppo di colori si uniscono nelle collezioni Deroma per dare vita a prodotti brillanti e originali. Questi prodotti nascono da lavorazioni differenti: dalle finiture smaltate delle collezioni Handmade Glazed alla terracotta artigianale, fino alle soluzioni in plastica di ultima generazione. Ogni materiale è valorizzato da un'attenta ricerca cromatica, con tonalità opache, lucide o naturali, pensate per adattarsi a stili e ambienti diversi.

Stilforschung, Formen, Oberflächen und Farbentwicklung vereinen sich in den Kollektionen von Deroma, um lebendige und originelle Produkte zu schaffen.

Diese Produkte entstehen durch unterschiedliche Verfahren: von den glasierten Oberflächen der Handmade Glazed-Kollektionen über handwerkliche Terrakotta bis hin zu modernen Kunststofflösungen.

Jedes Material wird durch eine sorgfältige Farbgestaltung hervorgehoben, mit matten, glänzenden oder natürlichen Tönen, die auf verschiedene Stile und Umgebungen abgestimmt sind.

Colours of Recycled & Recyclable

Terracotta

Derived from clay fired at high temperatures, terracotta is characterised by its robustness and ability to naturally regulate moisture, thanks to its porous structure. These properties make it particularly suitable for outdoor use, where it guarantees durability and resistance to weathering. The colour variations and surface textures resulting from the manufacturing process give each piece an authentic and distinctive appearance.

Derivata dall'argilla cotta ad alte temperature, la terracotta si distingue per la sua robustezza e la capacità di regolare naturalmente l'umidità, grazie alla struttura porosa. Queste proprietà la rendono particolarmente adatta all'uso in esterni, dove garantisce durata nel tempo e resistenza agli agenti atmosferici. Le variazioni cromatiche e le texture superficiali, esito del processo di lavorazione, conferiscono a ogni pezzo un aspetto autentico e distintivo.

Terrakotta wird aus bei hohen Temperaturen gebranntem Ton gewonnen und zeichnet sich durch seine Robustheit und seine Fähigkeit zur natürlichen Feuchtigkeitsregulierung dank seiner porösen Struktur aus. Diese Eigenschaften machen sie besonders geeignet für die Verwendung im Freien, wo sie Langlebigkeit und Witterungsbeständigkeit garantiert. Die durch den Herstellungsprozess bedingten Farbunterschiede und Oberflächenstrukturen verleihen jedem Stück ein authentisches und unverwechselbares Aussehen.

Breathable, Natural, Versatile

Porosity and Plant Health

Terracotta is the ideal material for ensuring the well-being of plants, as it promotes the passage of air and water, thus improving the growth and development of the root system.

Porosità e Salute delle Piante

La terracotta è il materiale ideale per garantire il benessere delle piante, poiché favorisce il passaggio di aria e acqua, migliorando così la crescita e lo sviluppo dell'apparato radicale.

Porosität und Pflanzengesundheit:

Terrakotta ist das ideale Material, um das Wohlbefinden von Pflanzen zu gewährleisten, da es den Luft- und Wasserdurchgang fördert und so das Wachstum und die Entwicklung des Wurzelsystems verbessert.

Natural and Sustainable

Terracotta is a resistant and durable material, capable of retaining its characteristics over time, even after prolonged use, allowing for continuous reuse without alteration.

Naturale e riutilizzabile

La terracotta è un materiale resistente e durevole, capace di conservare le proprie caratteristiche nel tempo, anche dopo un utilizzo prolungato, permettendo un riuso continuo senza alterazioni.

Natürlich und umweltverträglich

Terrakotta ist ein widerstandsfähiges und langlebiges Material, das auch nach längerem Gebrauch seine Eigenschaften beibehält und eine kontinuierliche Wiederverwendung ohne Veränderungen ermöglicht.

Also perfect for indoors

Combined with waterproof saucers, terracotta pots are easily adapted for indoor use. In addition to retaining the moisture needed by the plant, they help create favourable conditions for its growth.

Perfetti anche per gli ambienti interni

Abbinati a sottovasi impermeabili, i vasi in terracotta si adattano facilmente all'uso all'interno della casa. Oltre a trattenere l'umidità necessaria per la pianta, contribuiscono a creare condizioni favorevoli alla sua crescita.

Zimmerpflanzen & Wellness

In Kombination mit wasserdichten Untersetzern lassen sich Terrakotta-Töpfe leicht für den Innenbereich verwenden. Sie speichern nicht nur die von der Pflanze benötigte Feuchtigkeit, sondern schaffen auch günstige Bedingungen für ihr Wachstum.

Terracotta Tuscany

Tuscany terracotta, obtained from the precious clays of the Tuscan hills, is worked according to ancient artisan techniques handed down through the ages.

This material, known for its high resistance to frost and natural breathability, is distinguished by the quality and refinement it imparts to each artefact.

The minerals in the clay generate delicate irregularities and unique colour nuances, giving each piece an authentic and timeless elegance.

La terracotta Tuscany, ottenuta da pregiate argille delle colline toscane, è lavorata secondo antiche tecniche artigianali tramandate nel tempo. Questo materiale, noto per la sua elevata resistenza al gelo e la naturale traspirabilità, si distingue per la qualità e la raffinatezza che conferisce a ogni manufatto. I minerali presenti nell'argilla generano delicate irregolarità e sfumature cromatiche uniche, donando a ogni pezzo un'eleganza autentica e senza tempo.

Die toskanische Terrakotta, die aus den wertvollen Tonen der toskanischen Hügel gewonnen wird, wird nach alten, überlieferten Handwerkstechniken bearbeitet. Dieses Material, das für seine hohe Frostbeständigkeit und natürliche Atmungsaktivität bekannt ist, zeichnet sich durch die Qualität und Raffinesse aus, die es den einzelnen Gegenständen verleiht.

Die Mineralien im Ton sorgen für feine Unregelmäßigkeiten und einzigartige Farbnuancen, die jedem Stück eine authentische und zeitlose Eleganz verleihen.

Detail of Sicilia's Pot

Detail of Tuscany's Pot

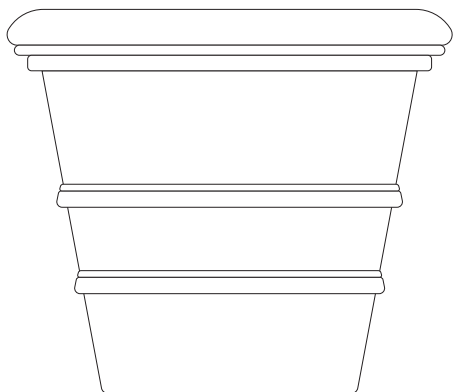

Detail of Graffio's Pot

Made from selected clay from the Tuscan hills, Galestro terracotta is distinguished by its mineral-rich composition, which guarantees high strength and durability even in outdoor environments. The naturally irregular finish gives the material a unique visual depth, with colour nuances that vary from piece to piece, making each vase unrepeatable. Processed using traditional local techniques, this terracotta combines robustness, authenticity and rustic elegance, bringing a distinctive character to any space.

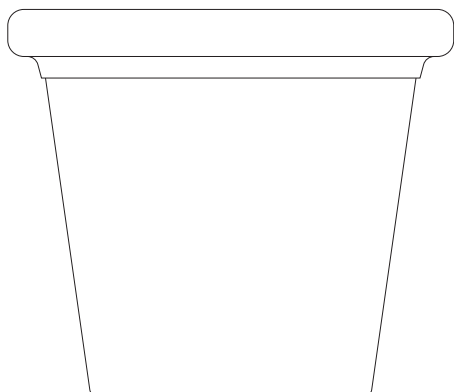

Realizzata con argilla selezionata delle colline toscane, la terracotta di Galestro si distingue per la sua composizione ricca di minerali, che ne garantisce elevata resistenza e lunga durata anche in ambienti esterni. La finitura naturalmente irregolare dona al materiale una profondità visiva unica, con sfumature cromatiche che variano da pezzo a pezzo, rendendo ogni vaso irripetibile. Lavorata secondo tecniche tradizionali locali, questa terracotta unisce robustezza, autenticità ed eleganza rustica, portando un carattere distintivo in ogni spazio.

Die aus ausgewähltem Ton aus den toskanischen Hügeln hergestellte Galestro-Terrakotta zeichnet sich durch ihre mineralreiche Zusammensetzung aus, die eine hohe Festigkeit und Haltbarkeit auch im Außenbereich garantiert. Die natürlich unregelmäßige Oberfläche verleiht dem Material eine einzigartige visuelle Tiefe, mit Farbnuancen, die von Stück zu Stück variieren und jede Vase unwiederholbar machen. Verarbeitet mit traditionellen lokalen Techniken, vereint diese Terrakotta Robustheit, Authentizität und rustikale Eleganz und verleiht jedem Raum einen unverwechselbaren Charakter.

Terracotta Handmade

The ancient tradition of creating handmade vases by skilled craftsmen lives on in Deroma products. From research and selection of the best clays, through manual processes of working and finishing the product, original vases with an ever-changing appearance are obtained.

L'antica tradizione di creare dei vasi fatti a mano da esperti artigiani vive ancora nei prodotti Deroma. Dalla ricerca e selezione delle migliori argille, attraverso processi manuali di lavorazione e rifinitura del prodotto, si ottengono vasi originali e dall'aspetto sempre diverso.

Die alte Tradition der handgefertigten Vasen durch erfahrene Handwerker lebt in den Produkten von Deroma weiter. Von der Forschung und der Auswahl der besten Tone bis hin zur manuellen Bearbeitung und Veredelung des Produkts entstehen originelle Vasen mit einem sich ständig verändernden Aussehen.

Attention to detail, unique finishes and every small natural imperfection make these products unique and precious, timeless and always protagonists. The clays used are natural and breathable, allowing the roots of the plant to breathe while growing healthy.

La cura del dettaglio, l'unicità delle finiture e ogni piccola naturale imperfezione rendono unici e preziosi questi prodotti, senza tempo e sempre protagonisti. Le argille utilizzate sono naturali e traspiranti, permettendo alle radici della pianta di respirare crescendo in salute.

Die Liebe zum Detail, die einzigartige Verarbeitung und jede noch so kleine natürliche Unvollkommenheit machen diese Produkte einzigartig und wertvoll, zeitlos und immer Protagonisten. Die verwendete Tonerde ist natürlich und atmungsaktiv, so dass die Wurzeln der Pflanzen atmen können und gesund wachsen.

Glazed Handmade

The Glazed Line stands out for its wide variety of shapes, colours and finishes, designed to suit every style and make every room unique and personal.

This versatile range offers solutions ranging from classic designs to more lively and original interpretations, allowing for the best expression of different tastes and personalities.

Glazed vases combine refined aesthetics with craftsmanship that guarantees resistance to breakage and low temperatures. Thanks to the breathability of terracotta, they ensure a healthy and ideal environment for growing plants.

La Linea Glazed si distingue per l'ampia varietà di forme, colori e finiture, pensata per adattarsi a ogni stile e rendere ogni ambiente unico e personale.

Questa gamma versatile offre soluzioni che spaziano da design classici a interpretazioni più vivaci e originali, permettendo di esprimere al meglio gusti e personalità diverse.

I vasi Glazed combinano un'estetica raffinata con una lavorazione artigianale che garantisce resistenza a rotture e basse temperature. Grazie alla traspirabilità della terracotta, assicurano un ambiente sano e ideale per la crescita delle piante.

Die Glazed Line zeichnet sich durch eine große Vielfalt an Formen, Farben und Ausführungen aus, die zu jedem Stil passen und jeden Raum einzigartig und persönlich machen.

Dieses vielseitige Sortiment bietet Lösungen, die von klassischen Designs bis hin zu lebendigeren und originelleren Interpretationen reichen und es ermöglichen, die verschiedenen Geschmäcker und Persönlichkeiten optimal zum Ausdruck zu bringen.

Die glasierten Vasen verbinden eine raffinierte Ästhetik mit einer handwerklichen Verarbeitung, die Bruchsicherheit und Kältebeständigkeit garantiert.

Dank der Atmungsaktivität von Terrakotta sorgen sie für ein gesundes und ideales Umfeld für das Wachstum von Pflanzen.

Colours, Strength, Personality

Colours & Emotions

The Glazed Line combines the natural breathability of terracotta with non-toxic pigments to ensure the safety and well-being of plants. Made from high-quality materials and craftsmanship, these pots offer strength and durability without sacrificing vivid, long-lasting colours.

Colore ed Emozione

La Linea Glazed unisce la naturale traspirabilità della terracotta a pigmenti atossici, per garantire sicurezza e benessere alle piante. Realizzati con materiali di alta qualità e lavorazione artigianale, questi vasi offrono resistenza e durata senza rinunciare a colori vivi e duraturi.

Farbe und Emotionen

Die Glazed Line kombiniert die natürliche Atmungsaktivität von Terrakotta mit ungiftigen Pigmenten, um die Sicherheit und das Wohlbefinden der Pflanzen zu gewährleisten. Die aus hochwertigen Materialien und handwerklichem Können hergestellten Töpfe sind robust und langlebig, ohne dabei auf lebendige, lang anhaltende Farben zu verzichten.

High Durability Pottery

These pots are designed to last, made of high quality materials and careful workmanship that guarantee superior durability. The terracotta used is robust and able to withstand harsh weather conditions without losing integrity or aesthetics.

Vasi molto resistenti

Questi vasi sono progettati per durare nel tempo, realizzati con materiali di alta qualità e lavorazioni attente che ne garantiscono una resistenza superiore. La terracotta utilizzata è robusta e capace di sopportare condizioni climatiche difficili senza perdere integrità o estetica.

Langlebige Töpfe

Diese Töpfe sind für eine lange Lebensdauer konzipiert und bestehen aus hochwertigen Materialien und einer sorgfältigen Verarbeitung, die eine lange Lebensdauer garantieren. Die verwendete Terrakotta ist robust und kann rauen Witterungsbedingungen widerstehen, ohne an Integrität oder Ästhetik zu verlieren.

Express Yourself

We use traditional craftsmanship techniques, handed down and perfected over time to enhance every detail of workmanship. Each piece is carefully modelled and finished by hand, ensuring unique aesthetics and a long lasting quality.

Esprimi te stesso

Utilizziamo tecniche artigianali tradizionali, tramandate e perfezionate nel tempo per valorizzare ogni dettaglio della lavorazione. Ogni pezzo viene modellato e rifinito a mano con cura, garantendo un'estetica unica e una qualità che si mantiene nel tempo.

Atmen und Wohlfühlen

Wir verwenden traditionelle Handwerkstechniken, die im Laufe der Zeit überliefert und perfektioniert wurden, um jedes Detail der Verarbeitung zu verbessern. Jedes Stück wird sorgfältig von Hand modelliert und vollendet, was eine einzigartige Ästhetik und langlebige Qualität gewährleistet.

Green up your life

Fiber

A mix of different materials combining resin with crashed stone powders, such as marble, granite or limestone. This makes it an excellence among fibers for creating durable pots and planters, with a natural look and a special finishing. Polystone is one of the best among lightweight handmade materials, with a natural stone-like appearance, a high-end and elegant look. The fiber products are easy to move, resistant to UV rays, moisture and temperature changes. They are suitable for indoor and outdoor use, and naturally water and frost resistant, with an anti-scratch finishing. Elegant and eclectic, the Fiber collection products are perfect for decorating outdoor spaces with a personal and timeless style, giving life to your own landscape project through the creation of original compositions.

Un mix di materiali diversi che unisce la resina con polveri di pietra come marmo, granito o calcare. Questo lo rende un'eccellenza tra le fibre per la creazione di vasi e contenitori per piante resistenti, dall'aspetto naturale e dalla finitura unica. Il Polystone è uno dei migliori materiali leggeri lavorati a mano, con un aspetto simile alla pietra naturale, un look raffinato ed elegante. I prodotti in fibra sono facili da spostare, resistenti ai raggi UV, all'umidità e agli sbalzi di temperatura. Sono adatti per uso interno ed esterno, naturalmente resistenti all'acqua e al gelo, con una finitura antigraffio. Eleganti ed eclettici, i prodotti della collezione Fiber sono perfetti per arredare gli spazi esterni con uno stile personale e senza tempo, dando vita al proprio progetto paesaggistico attraverso la creazione di composizioni originali.

Eine Mischung aus verschiedenen Materialien, die Harz mit Steinpulvern wie Marmor, Granit oder Kalkstein kombiniert. Dies macht es zu einer ausgezeichneten Faser für die Herstellung von Pflanzgefäßen und Behältern mit einem natürlichen Aussehen und einer einzigartigen Oberfläche. Polystone ist eines der besten handwerklich hergestellten, leichten Materialien mit einem natursteinähnlichen Aussehen, einem raffinierten und eleganten Look. Faserprodukte sind leicht zu bewegen und widerstandsfähig gegen UV-Licht, Feuchtigkeit und Temperaturschwankungen. Sie sind für den Innen- und Außenbereich geeignet, von Natur aus wasser- und frostbeständig und haben eine kratz feste Oberfläche. Die eleganten und eklettischen Produkte der Fiber-Kollektion eignen sich perfekt für die Einrichtung von Außenbereichen mit einem persönlichen und zeitlosen Stil, der Ihre eigene Landschaftsgestaltung durch die Schaffung origineller Kompositionen zum Leben erweckt.

Geomaterial

Geo-Material is an innovative, low environmental impact material that combines sustainability and performance, representing the new frontier of eco-friendly materials. With Geomineral, Deroma offers a range handmade with artisanal techniques that guarantee uniqueness and quality, with a material finish.

Il Geo-Material è un materiale innovativo, a basso impatto ambientale che unisce sostenibilità e performance, rappresentando la nuova frontiera dei materiali eco-friendly.

Con Geomineral Deroma propone una gamma realizzata a mano con tecniche artigianali che ne garantiscono unicità e qualità, dal finish materico.

Geo-Material ist ein innovatives, umweltfreundliches Material, das Nachhaltigkeit und Leistung vereint und die neue Grenze der umweltfreundlichen Materialien darstellt. Mit Geomineral bietet Deroma ein Sortiment an, das mit handwerklichen Techniken hergestellt wird, die Einzigartigkeit und Qualität garantieren, mit einem materiellen Finish.

Recycled & Recyclable Plastic

The circular economy is a model of sustainable development that aims to reduce waste, reuse resources and valorise materials throughout the life cycle of products.

Deroma focuses on this type of material to reduce environmental impact and create lasting value. We follow the principles of design for recycling where both the use of materials and the design of the product itself are designed to make the pot as durable as possible and to make it easy to dispose of and recycle at the end of its life

L'economia circolare è un modello di sviluppo sostenibile che mira a ridurre gli sprechi, riutilizzare le risorse e valorizzare i materiali lungo tutto il ciclo di vita dei prodotti.

Deroma punta su questo tipo di materiale per ridurre l'impatto ambientale e creare un valore duraturo nel tempo. Seguiamo i principi del design for recycling dove sia l'utilizzo dei materiali che il design del prodotto stesso sono studiati perchè il vaso sia il più durevole possibile e al fine di rendere agevole lo smaltimento e l'eventuale riciclo a fine vita del prodotto

Die Kreislaufwirtschaft ist ein Modell der nachhaltigen Entwicklung, das darauf abzielt, Abfälle zu reduzieren, Ressourcen wiederzuverwenden und Materialien während des gesamten Lebenszyklus von Produkten aufzuwerten.

Deroma konzentriert sich auf diese Art von Materialien, um die Umweltauswirkungen zu verringern und einen dauerhaften Wert zu schaffen. Wir folgen den Grundsätzen des Design for Recycling, bei dem sowohl die Verwendung von Materialien als auch das Design des Produkts selbst so gestaltet sind, dass der Topf so langlebig wie möglich ist und am Ende seiner Lebensdauer leicht entsorgt und recycelt werden kann

Light, Recyclable & Fun

Deep changes

Our commitment to the environment is pursued first and foremost through the choice of high-quality raw materials, to ensure that our products in the Technical Plastics Line have high properties and are themselves recyclable. Made from post-consumer plastics obtained from waste packaging in separate waste collection.

Profondi cambiamenti

L'impegno per il rispetto ambientale si persegue innanzitutto con la scelta di materie prime di alta qualità, per assicurare ai nostri prodotti della Linea Tecnica Plastica elevate proprietà e di essere a loro volta riciclabili. Realizzati con plastica post-consumo ottenuta da imballaggi di scarto nella raccolta differenziata.

Tiefgreifende Veränderungen

Unser Engagement für die Umwelt wird in erster Linie durch die Auswahl hochwertiger Rohstoffe verfolgt, um sicherzustellen, dass unsere Produkte der Produktlinie Technische Kunststoffe hohe Eigenschaften aufweisen und selbst recycelbar sind. Hergestellt aus Post-Consumer-Kunststoffen, die aus Verpackungsabfällen in der getrennten Abfallsammlung gewonnen werden.

Enhancing the value of plastics

Our plastic collections offer a wide range of choices in terms of shapes, colours, sizes and fittings, leaving the consumer with the choice to customise their indoor and outdoor spaces.

Valorizzare la plastica

Le nostre collezioni in plastica offrono numerose possibilità di scelta per forme, colori, dimensioni e dotazioni, lasciando al consumatore la scelta di personalizzare i propri spazi sia indoor che outdoor.

Wertschätzung von Kunststoffen

Unsere Kunststoffkollektionen bieten eine große Auswahl an Formen, Farben, Größen und Ausstattungen, so dass der Verbraucher die Möglichkeit hat, seinen Innen- und Außenbereich individuell zu gestalten.

Plastic as a Resource

The products in the Plastic Collections are designed to ensure the well-being of plants and those who use them. From the integrated water reservoir to ensure proper plant hydration at all times, to the wheels available on many large models to allow easy movement... everything is designed to fully and comfortably enjoy your garden...

Plastica come risorsa

I prodotti delle Collezioni in plastica sono realizzati per assicurare il benessere delle piante e di chi li utilizza. Dalla riserva d'acqua integrata per garantire sempre la corretta idratazione della pianta, alle ruote disponibili su molti modelli di grandi dimensioni per permettere spostamenti agevoli... tutto è pensato per vivere pienamente e con comodità il proprio giardino...

Kunststoff als Ressource

Die Produkte der Plastic Collections sind so konzipiert, dass sie das Wohlbefinden der Pflanzen und derjenigen, die sie benutzen, gewährleisten. Vom integrierten Wassertank, der jederzeit eine ausreichende Versorgung der Pflanzen gewährleistet, bis hin zu den Rädern, die bei vielen großen Modellen vorhanden sind, um einen einfachen Transport zu ermöglichen... alles ist so konzipiert, dass Sie Ihren Garten in vollem Umfang und bequem genießen können...

Characteristics

Frost and UV resistant;
Integrated water reserve;
Overflow hole to avoid water excess;
Indoor and outdoor use.

Resistente al gelo e ai raggi UV;
Riserva d'acqua integrata;
Foro per permettere la fuoriuscita
dell'acqua in eccesso;
Utilizzo indoor e outdoor.

Frost- und UV-beständig;
Integriertes Wasserreservoir;
Abflussloch um überschüssiges Wasser
zu vermeiden;
Für Indoor und Outdoor.

Water Reserve with overflow.

Riserva d'acqua con foro anti-trabocco.

Wasserreservoir mit Überlauf.

Green up your life

Recycled & Recyclable Plastic

Characteristics

Frost and UV resistant;
Integrated water reserve;
Overflow hole to avoid water excess;
Indoor and outdoor use.

Resistente al gelo e ai raggi UV;
Riserva d'acqua integrata;
Foro per permettere la fuoriuscita
dell'acqua in eccesso;
Utilizzo indoor e outdoor.

Frost- und UV-beständig;
Integriertes Wasserreservoir;
Abflussloch um überschüssiges Wasser
zu vermeiden;
Für Indoor und Outdoor.

Water Reserve with overflow.

Riserva d'acqua con foro anti-trabocco.

Wasserreservoir mit Überlauf.

Plants in the picture
Dendrobium Nobile

Green up your life

Characteristics

Transparent plastic pot cover suitable for orchids: their roots must be exposed to sunlight, making them stronger and resistant; the inside bottom of the pot is raised allowing them to always be dry.

Cachepot in plastica trasparente adatto alle orchidee: le loro radici sono così esposte alla luce del sole, rendendole più forti e resistenti; il fondo interno del vaso è rialzato, consentendo loro di essere sempre asciutte.

Transparenter Kunststofftopf für Orchideen: ihre Wurzeln müssen dem Sonnenlicht ausgesetzt sein, was sie stärker und widerstandsfähiger macht; Der innere Boden des Topfes ist erhöht, so dass sie immer trocken sind.
